

EMPLOYER SURVEY DATA

April 2024

The Employer Survey is an EPP generated survey that collects data on an annual basis. The instrument evaluates the performance of completers on CAEP skills and poses open-ended questions. The survey assesses the raters' satisfaction with the program completers' performance relative to a set of skills, knowledge and professional dispositions. Respondents rate their satisfaction on a 4-point Likert Scale: Strongly Satisfied, Satisfied, Dissatisfied, Strongly Dissatisfied.

The questions gauge the extent to which the employee effectively collects, manages, evaluates and applies data, uses research and understands different methodologies, employs data analysis to develop supportive school environments, leads collaborative activities with others, uses appropriate applications of technology, applies professional dispositions, laws and policies, supports instructional practice that is consistent with learning and effective pedagogy, evaluates teachers' instructional practices and uses data and feedback to foster student engagement. The employers were asked to rate the knowledge, skills and professional dispositions as strongly satisfied, satisfied, dissatisfied and strongly dissatisfied.

The 2024 survey indicates that 100% of employers were either satisfied or strongly satisfied on all measures. Areas of strength where 100% of responders noted strong satisfaction include collects, manages, evaluates, and applies data in critical manner (CAEP A1.1). Comments regarding areas of strength included organizational management and cultural competency, strong problem-solving skills and strength in dealing with disciplinary issues. Areas for improvement indicated that the completers needed more opportunities to gain experience understanding educational law and policy and how it impacts decision making.
